

David Luo

3A Software Engineering

(647) 760-8741 | david.luo1996@hotmail.com | davidluo.ca | github.com/dluo

SKILLS

Languages: Python, C/C++, Javascript, PHP, Swift, Java, Scala

Technologies: Git, SQL, Gerrit, Google App Engine, jQuery

EXPERIENCE

Ritual Sep. – Dec. 2016
Data Scientist Toronto, ON

- Designed and built machine learning pipeline as the sole developer to predict likelihood of referral success, improved success of referral suggestions from 60% to 70%
- Reduced run time of BigQuery database sync script by incorporating parallel computing
- Designed pipeline for recommendation engine and selected relevant features to use
- Created dynamic data visualization tool for user cohort analysis, used on a daily basis
- Wrote queries in BigQuery and MySQL to visualize the impact of new features and promotions, as well as to retrieve data for providing feedback to merchants

Osellus Mobile Jan. – Apr. 2016
Mobile Developer Toronto, ON

- Implemented data visualization application using Swift
- Optimized application's built-in cache to reduce fetch time by 80%
- Developed algorithm to generate large amount of random data in preparation for future graph anomaly detection
- Migrated and refactored Objective-C codebase to Swift

Ontario Ministry of Education May – Aug. 2015
Software Tester Toronto, ON

- Developed SQL scripts to process business data, generate reports and automate testing of data migration
- Increased accessibility of software for disabled users by implementing bug fixes
- Documented application workflow, used by all team members and presented to clients

PROJECTS

Yelp Rating Predictor (Python) Nov. – Dec. 2016

- Predicts review star rating using a classifier trained with NLP techniques

Myo iTunes Controller (Lua) Feb. 2015

- iTunes controller which detects and translates hand gestures into commands

EDUCATION

University of Waterloo, Bachelor's in Software Engineering 2014 – 2019 (expected)
